# Give yourself the gift of timeless beauty with PDO Max Threads.

PDO Thread treatments are non-surgical esthetic procedures that reposition static sagging skin. In less than one hour, we can turn back time and transform your look with virtually no down time. Restore your youthful look, reflect how you feel inside, and be confident with PDO Threads.

There are no cuts and no incisions. Using a very fine acupuncture needle, special dissolvable threads made of polydioxanone (PDO) are injected into the skin, and sometimes the muscle, to tighten the skin. PDO threads have been used in medicine for many years, mainly in surgery. PDO sutures have been used for Pediatric Cardiac surgery for over 35 years.

PDO threads have a powerful dual effect. The first is to reposition skin, giving a lifted effect. The second is to stimulate your body's own collagen, elastin and hyaluronic acid. A rejuvenated appearance can be seen immediately following the treatment; however, the results will improve in the following days and weeks as the PDO stimulates neocollagenesis, which in turn produces collagen. The overall texture of the skin is improved; it becomes thicker, tighter and firmer and other skin issues like open pores, fine lines and wrinkles are smoothed away as well.

**Call today to schedule your consultation and to restore your youthful look with PDO Max Threads.**
